Research Notes: Yinliang Tan

July 6, 2017

Yinliang “Ricky” Tan's paper “Mitigating Inventory Overstocking: Optimal Order-up-to-Level to Achieve a Target Fill Rate,” co-authored with Anand Paul of the University of Florida, Qi Deng of Shanghai University of Finance and Economics and Lai Wei of Shanghai Jiaotong University, has been accepted for publication in Production and Operations Management (POM). Tan is an assistant professor of management science at Tulane University’s A. B. Freeman School of Business.
