Forbes: Are The Oil Giants Rising To Shareholder Demands And Cutting CO2 Levels?

June 11, 2020

<u>Pierre Conner</u>, professor of practice and executive director of the <u>Tulane Energy</u>
<u>Institute</u>, was interviewed by <u>Forbes</u> senior contributor <u>Ken Silverstein</u> for a story about whether oil companies are cutting carbon dioxide emissions in response to the demands of activist investors.

"Driving down the cost of capital is every company's mandate to create present value," says Pierre Connor, executive director of the <u>Tulane</u> <u>University Energy Institute</u>, in an interview with this writer. "Therefore if you follow that logic, you will see the reaction to demands for increased transparency and changing priorities."
