WGNO-TV: Louisiana could soon enrich and dispose of nuclear fuel

July 30, 2026

Eric Smith, professor of practice and associate director of the Tulane Energy Institute , was interviewed by WGNO-TV about the U.S. Department of Energy's selection of Louisiana as potential host for a nuclear lifecycle innovation campus, which would support activities across the full nuclear fuel lifecycle, from fabrication and enrichment to disposing used fuel.

> “We’re an industrial state. So, we’re not scared off by having things like refineries, and petrochemical plants,” says Eric Smith, associate director of the Tulane Energy Institute. “Maybe we should be a little bit, but we’re used to it.”
